Discussion and Lab Section Registration

Dear Colleague,

If your fall course will have a discussion or lab section, complete the Discussion Section Information form and give it to your departmental registrar by Monday, March 27.

Provide all the section meeting times on the form as soon as the times are established so that your departmental registrar can enter the days/times in WEN before students begin to enroll in sections on April 17. If sections are not added before registration opens, you will not be able to have students register for discussion and lab section through the registration system. Update the form or email your registrar with any missing meeting time information as soon as possible.

For questions about discussion or lab section setup, write to registrar.asc@yale.edu.

Thank you for your help in this important process.

Sincerely,

University Registrar’s Office
