Transition from SIS to Yale Hub

Dear Campus Partners,

The message below was recently sent to Yale College, Graduate School, and most Professional School students announcing the move from the current Student Information System (SIS) to Yale Hub.

SIS will be permanently retired by mid-June. It is important that you update all mentions of SIS to Yale Hub on your websites and in your messaging to students. We encourage you to share this message with others who may be impacted by the change.

Thank you,
University Registrar’s Office

_____________________________________________________________________

Dear Student,

Yale Hub is a one-stop online resource and includes all student systems previously found on SIS, as well as easy access to other university applications.

The Student Information System (SIS) is permanently transitioning to the new, personalized, customizable, and mobile-friendly Yale Hub in mid-June. You can start using Yale Hub immediately. Portions of the Hub are responsive to your role as a student and will dynamically change as your student status changes.

Best wishes for a wonderful summer,

Sincerely,

University Registrar’s Office
